

Hybrid Iron Specs

POWERED BY **KBS**

The KBS TGI – Tour Graphite Iron is designed for players looking for maximum steel like play-ability, shot control and performance in a graphite shaft, developed from optimized weight and stiffness.

At Eleven Golf, we are passionate about creating golf clubs that improve your game and bring you closer to your goals. Our award-winning irons have won the titles of Best Game Improvement and Best Moderate Speed in 2023. We incorporate a deep centre of gravity into our designs to promote higher launch and peak height. Our perimeter weighting provides added forgiveness on off-centre hits, and our new sole design makes our clubs playable from any lie. Our clubs are designed to give you the highest launch possible for increased carry, making every swing count.

Hybrid Club	3	4	5	6	7	8	9	P	G
Loft	18°	21°	24°	27°	31°	35°	39°	43°	47°
Lie	60.5°	61°	61.5°	62°	62.5°	63°	63.5°	64°	64°
Swing Weight	D2	D2	D2	D2	D2	D2	D2	D3	D3
Length (Inches)	39 ½	39	38 ½	38	37 ½	37	36 ½	36 ¼	36

Please note, these are the specifications for all of our clubs as standard, though we can fully adjust the length of the clubs to your own desired specification. To do so, simply instruct us to build your club to your desired length using the 'add a note' function which can be found in your basket before checkout. Our club heads have been designed to receive incrementally shorter shafts, the shorter our hybrid irons get; therefore we do not offer our clubs in a 'single length' configuration.

Unfortunately, we cannot adjust the lie angle of these clubs due to our hybrids having shorter hosels than traditional irons, and this process can damage the clubs. This will not prevent you from having this carried out by a 3rd party club fitter, however it will void the 12-month warranty that is supplied with your clubs when purchased.
